Create first repository at remote side

Create a new repository

A repository contains all project files, including the revision history. Already have a project repository elsewhe Import a repository.

Required fields are marked with an asterisk (*).

Owner *

🟢 karanAtreya1986 ▾ /

Repository name *

GitHubCourse

✅ **GitHubCourse is available.**

Great repository names are short and memorable. Need inspiration? How about **literate-octo-dollop** ?

Description (optional)

this is my gihub project for practice

🔘 **Public**
Anyone on the internet can see this repository. You choose who can commit.

⚪ **Private**
You choose who can see and commit to this repository.

Initialize this repository with:

☐ **Add a README file**
This is where you can write a long description for your project. Learn more about READMEs.

Add .gitignore

.gitignore template: None ▾

Repo name or project name means the same thing.

Remote means the gihub side.
